

Help Save our Marine Life!

Glunz Ocean Beach Hotel & Resort has taken another step by not only staying an ecofriendly resort, but by also helping to save our marine life. We have decided with the idea of one of our guests, to do away with the complimentary plastic bottled water and install a refrigerated, filtered water system for our guests to use throughout their stay. In the past year, we have purchased up to 12 pallets holding 60 cases each with 36 bottles per case that totals out to a whopping 25,920 plastic water bottles! Each one of our guests will receive two complimentary Glunz Tumblers as a take home souvenir upon arrival to use during their stay. These Tumblers may also be used at our popular Havana Jack's Oceanside Restaurant located right next door! It gets better though, we also have done away with plastic straws and now have Stainless Steel Straws available for purchase at our front desk, Havana Jack's Restaurant and Java Jack's Beach Café. These straws are \$2.00 each and 25% of the purchase will be donated to our Turtle Hospital located right here in Marathon, FL. *Isn't that just Awesome? We think so and ask that you help save the Earth too!*
